

# Companion Way Doors

- Stainless Steel (type 113-50)
- Aluminium (type 113-22)

01

02

**Trend Marine Products has been developing and expanding its range of companion way doors for 30 years.**

Both curved and flat units are supplied with a wide range of possible configurations and dimensions. Electric drives an option.

All stainless steel doors are produced from 316 grade material and finished with a high polish.

All fittings are of the highest quality and are validated in Trend Marine's engineering workshops. A wide array of glass colours and effects are available from stock.

Various rolling element track systems are used to give durable, high quality motion.

These doors are manufactured at our factory in the UK and are sold throughout the UK, Europe, Middle East, Far East and North America.

## Approvals:

- To meet the requirements of all classification bodies (e.g. RINA, Lloyds, BV, ABS, etc.)
- RINA type approval: DIP033608XU
